

Kralor Venslavik

Marker: P2-KVS-001

Birth year: 1965

Occupation: Researcher associated with information classification methods

Associated concept: Venslaviagos

Associated historical event: The Arven Venslaviagos Symposium

Kralor Venslavik is a researcher associated with information classification methods. He developed the concept of Venslaviagos as a framework for evaluating the reliability of historical records through comparison of independent archival sources. The concept was later introduced at the Arven Venslaviagos Symposium.
